Expectations for the SET I was hoping for a good cross agency communication SET
What Occured From my location at the Redcross area HQ all appeared to go as planed.
I concerned myself with Redcross traffic while monitoring th other agencys involuved.
The links to Franklin Co. were very effective and my congratulations to Bill Wells
W4BOT for his efforts.

What Went Well and Why Winlink worked as intended due to prior planing and
testing.

Improving Operation and How Voice on the VHF repeters was somewhat chaotic this
was due to a lack of net control stations. With new hams helping it is critical that we have
experienced NCS opperators on all net freq's. Also these NCS stations need to cooradnate
with each other possibly using Winlink or relays (stations capable of bridging the gaps
between repeaters) as conditions change durring an event.
