Expectations for the SET To operate using radios (voice) on SET Nets and to operate using radios to send data (airMail). Separate nets for hospital net, general SET net, and skyWarn net

What Occured Much as I expected with an exception that the SkyWarn Net had to operate the same repeater as the regular net due to technical difficulties. This was actually the kind of thing you would see in a real disaster. While it added a little confusion, it was manageable.

What Went Well and Why The operators at the Floyd EOC work together well. The more experienced operators guided the rest of us so we all learned some.

Improving Operation and How I think we need a couple headsets. In real disaster the Floyd EOC would also have county officers trying to plan and coordinate along with the radios in the background; that could cause distractions. So having two or three radio operators with headsets to do the radio monitoring and net participation would work better.
