

Expectations for the SET	Expected to send pre-drafted exercise messages and respond to incoming messages.
What Occured	Sent 5 pre-drafted messages (sent one a second time due to error in address. Received replies for all five messages. A total of 37 WINLINK messages were processed.
What Went Well and Why	1. All WINLINK messages were passed through K7BC-10 RMS Packet node without issues. 2. Participated in HF Net on 75 and 60 meters during entire exercise. QRM chased the net off 75M up to 60M a little early, but net operated successfully for the entire exercise.
Improving Operation and How	Pre-drafted messages were created as duplicates to be sent by multiple stations within the same county. That may have been good for loading the WINLINK system, but would not be satisfactory technique during real event.
