|-------------------------------------|--|
| Expectations for the SET | To continue to hone our skills with Winlink and computer operations. Expected to increase our message volume by a large amount. Also to further test and refine the systems on the trailers. |
| What Occured | Exactly what I expected. All upgraded systems performed beautifully. Message volume was substantially increased. |
| What Went Well and Why | Winlink traffic was handled quickly and smoothly due to the proficiency of Frank on the computer. He is a wizard. HF voice comms were also effective although little used. HF Pactor worked as expected but was not used because of the greater speed of the VHF Packet Winlink. |
| Improving Operation and How | Generally we need to develop relationships with other hospital systems (Carilion) and local governments. Will seek to develop more small localized SETs to improve our presence in the local EOCs. |
