

Name	Frank Howard
Call	WB1USN
Expectations for the SET	Send and receive Winlink messages to and from the Marion, VA VDH Office along with being HF Net Control
What Occured	Send and receive Winlink messages to and from the (Simulated) Marion, VA VDH Office along with being HF Net Control
What Went Well and Why	Sent 208 Winlink Messages / Received 36 / We had HF 20 total check ins and 78 voice messages Had spent some time during the previous week gathering data and ideas to make simulated traffic to VDEM more plausible Was able to create new contacts list in Winlink that included all HAMS listed on the EMP SET website - Will be writing up full instructions on how it was accomplished
Improving Operation and How	1. Our VDH liaison backed out less than one week before the SET so we did not move the comms trailer 2. Only one station sent any simulated message traffic to us 3. My Winlink Gateway was not operational even though we had tested it earlier in the week (now back operational after restart)
Your Operating Location	Max Meadows (KE4RL QTH) Simulating Marion VDH office
