

Name	Larry Burns
Call	KM4TDC
Expectations for the SET	1. To offer help to those that were affected more than our area. 2. To test deployment of communication equipment and personnel. 3. To receive requests for aid or equipment.
What Occured	1. Deployment and setup of equipment went well. No glitches surfaced. 2. We sent out sitreps and offers for aid. 3. We began training 3 new hams on our EOC equipment and procedures. 4. We received several messages that said they were Sitreps or 213s, but no form was attached. I don't think I've seen that before.
What Went Well and Why	Firstly, the HF voice net provided valuable information and created a sense of belonging that had been missing in previous SETs. Good job! Setting up went well. During the past year we created a local VHF gateway for high speed Bars and packet as well as several local digits that gives our area more efficiency in passing and receiving traffic.
Improving Operation and How	I believe the creation of a dedicated P2P station at each participating entity would speed things up. It would reduce the traffic load on the gateways for general messaging. Each entity would choose their own mode and frequency to receive traffic on and publish this info in their 205. Setting up a published monitoring schedule would help. P2P would be best on hf.
Your Operating Location	Monterey, Highland County.
