

<b>Name</b>	Danny Wylam
<b>Call</b>	AI4RC
<b>Expectations for the SET</b>	I expected to make contact with other stations via winlink or phone
<b>What Occured</b>	I was able to send and reply to 5 winlink messages. My only phone contact was on HF with KE4RL,net control.
<b>What Went Well and Why</b>	Winlink worked due to the diligence of the SYSOPS and the winliink development team
<b>Improving Operation and How</b>	I would like to see agencies be more involved. No agency has ever contacted me and said, "there's going to be an SET involving ham radio can you help us"? I had a years long involvement with one and never was asked that question. I hope it doesn't take the real thing to bring them around and I have no suggestions to improve the situation. After years of trying I gave up. We need to continue to do our part by training. Thanks to everyone that took time to participate.
<b>Your Operating Location</b>	My OTH in Christiansburg VA, representing Red Cross Montgomery
<b>Other Calls at Your Location</b>	none
<b>Messages Sent</b>	6
<b>Messages Received</b>	6
