Expectations for the SET	I participated in the drill in 2017. I expected this drill to be organized and realistic. Just like 2017's drill.
What Occured	The drill was very organized and the messages were realistic. HF SSB NET CONTROL as designated was not heard at my local. I made contact with W1RVR in VA who was working the event as well.
What Went Well and Why	I operated from home connecting inter and intra state to HF Winlink PACTOR GATEWAYS. At one point I could not connect to any PACTOR Winlink Gateway in Virginia for message delivery, so I found a open(conditions) Gateway out of state and messaged. Pactor is fast and not easily impacted by QRM.
Improving Operation and How	This drill is the premier ENCOMM drill for Virginia with a long history of operation at a high and sustainable level. It would be good to have more of a lift from other statewide entities who practice Winmlink messaging.
