

News for 8-1-2004

All participates should click on the button for form FSD-218 and print it and bring that with you on August 7th.

All ARES members that have an assigned location, needs to bring their equipment early and be set up to operate by 9:00 a.m. Those working inside RAAP will not have the opportunity to do that prior to 9:00 a.m. The reason for the advanced preparation is this exercise is compressing about 2 days into 4 hours.

If you are unsure of conditions at your assignment, bring a table and chair to operate from and any emergency power that you have available. Bring power cords to give yourself separation from other stations that will be operating in the area with you.

Be prepared for the possibility of rain. Disaster doesn't always occur on sunny days.

We now have 45 ARES members that are registered to assist in the operation. Click on the participates list to ensure that you are registered if not, contact W4GHS.
