

Name	Jim Arab
Call	KV4JM
Expectations for the SET	I was not sure what to expect as an individual operator. All of the e-mails (unless I missed something) leading up to the SET gave instructions for those representing agencies. I never saw any particular instructions for an individual operator.
What Occured	I only heard a few partial station check-ins on 3.947 and those were very faint and hard to copy. I don't think I ever heard net control. I checked 7.240 a few times and only heard some bleed-over from a rag chew session around 2.242. I gave up after about 45 minutes and shut down for the day. I did not check Winlink for activity because I didn't know 213's were being sent to all participants. When I did open Winlink on Sunday for a non-SET activity, I found 11 SET messages in my inbox.
What Went Well and Why	Nothing for me.
Improving Operation and How	Please give clearer instructions for individual operators, especially those operating outside of the SET impact area.
