

<b>Name</b>	Owen Harned
<b>Call</b>	W4ONH
<b>Expectations for the SET</b>	Test the ability to activate and establish voice and data communications with Network Station (NCS) and Winlink on local and appropriate Statewide exercise participates.
<b>What Occured</b>	Established voice communications via VHF repeater connectivity with NCS and other facility. Attempted VHF simplex connectivity with NCS and other facility. Attempted digital Winlink P2P direct and digipeater connectivity with NCS. Direct would not connect with NCS, digipeater connectivity would connect with no traffic passed. Received one P2P via digipeater message from RHCC.
<b>What Went Well and Why</b>	VHF voice repeater network configuration and operation worked good.
<b>Improving Operation and How</b>	Digital network configuration and integration needs reviewed.
<b>Your Operating Location</b>	Patriots Colony, Williamsburg, VA
