

<b>Name</b>	Rockbridge Amateur Radio Club W4ROC
<b>Call</b>	W4SVP
<b>Expectations for the SET</b>	We expected to have stations in the affected area requesting assistance from VDEM and other outlying areas and agencies utilizing the Winlink ICS-213 C-SALTT format. Expected to have VDEM Communications Via Winlink and VHF Repeaters in District Six
<b>What Occured</b>	Members received and passed traffic via Winlink VHF, while maintaining local communications through Simplex and local repeaters. Members checked into the HF SSB nets with good quality signals reported. Winlink traffic was received and responded to in record time.
<b>What Went Well and Why</b>	Members supported their EM operations in the cities of Lexington, Buena Vista, Salem and Rockbridge County. All stations had VHF, HF, Voice Com's and VHF/HF Winlink capability that was utilized in the SET and worked flawlessly. Member preparation for the SET was excellent, due to their participation in daily and weekly Nets including Traffic Nets, utilizing Winlink Packet, VARA and P2P communications. All members had emergency power backup. HF Net Control Stations did an Outstanding Job under high QRM conditions.
<b>Improving Operation and How</b>	Having personnel in the affected area prepare traffic with request for aid /support via the C-SALTT format would have added to the training experience. Members believe if VDEM played a bigger role in our SET that would happen.
<b>Your Operating Location</b>	Rockbridge County VA Nelson County VA Lexington Va Salem / Roanoke VA
